2. Citations and explanations:

Reference is made to the following documents:

D1: KR 2004-23108 A D2: JP 07-265582 A

The present invention relates to a drain hose fixing assembly of a dishwasher including a holder body provided at an outer circumference with at least one hook and an interference preventing rib formed on an inner circumference of the holder body to prevent a drain hose from interfering with the hook and a supporting rib extending from an outer circumference of the holder body.

D1 discloses a drain hose fixing assembly of a dishwasher including a holder body provided at an outer circumference with at least one hook and an interference preventing rib formed on an inner circumference of the holder body to prevent a drain hose from interfering with the hook.

D2 discloses a holder for clamping and holding the water discharge hose which is rotatably and loosely fitted in a support plate.

Novelty

None of the prior documents D1 and D2 disclose a drain hose fixing assembly of a dishwasher as set forth in the present claims 1-20. Therefore, the subject matter of claims 1-20 is considered to be novel under PCT Article 33(2).

In case the space in any of the preceding boxes is not sufficient.

Continuation of:

Inventive Step

The holder body provided at an outer circumference with at least one hook and the interference preventing rib and the supporting rib of claims 1–20 can be readily derived from a combination of D1 and D2 which include a hook, a interference preventing rib and a support plate. Accordingly, the subject matter of claims 1–20 does not involve an inventive step under PCT Article 33(3).

Industrial Applicability

Claims 1-20 are considered to be industrially applicable under PCT Article 33(4).
